

LED PEDESTRIAN CROSSWALK SIGN RETROFIT KIT

LED Retrofit kit converts Pedestrian Crosswalk Signs to advanced LED technology in less than 15 minutes. LED technology extends the service life of the light source while reducing energy consumption to just 100 watts!

Product Specifications:

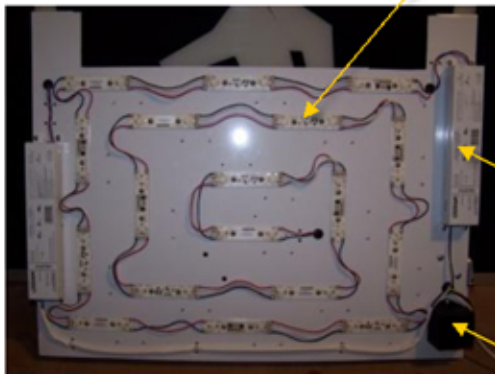

- Easy install – typically less than 15 minutes
- Simple - 7 screws plus electrical connection
- 12-15 year average operating life (12 hrs/day)
- 60% reduction in energy consumption
- Advanced Surge Suppression
- UL Power supply and LED systems
- Power Supply: IP rated, universal voltage (120-277v)
- LEDs: white high output, ultra long life
- High performance aluminum thermal management
- Extreme temperature tested
- Current management electronics for long life and color stability
- Conformal coated for corrosion and moisture protection
- Made in NAFTA
